

# For handling finished or semi-finished round stock / pipe

HPR electro-permanent magnetic modules are the ideal answer for handling rounds and tanks with limited air gap.

- Excellent power to weight ratio
- Multi-pole powered magnetic circuit insures no residual magnetism and high performance with a low flux depth
- Maximum working load up to 10 Tons

#### Standard Operational Features:

- Adjustable power level for de-staking plates and slabs as needed
- Radio remote
- No residual magnetism
- Low flux depth
- Test lift function insures safe load handling each and every time by insuring a minimum safety factor is guaranteed with each and every lift
- Status lights
- Electro perm technology saves energy
- No moving parts to wear out
- On board controls for easy installation

#### Optional:

- 1. Removable poles shoes
- 2. Dual controls
- 3. Temperature sensor
- 4. Hi temp version available on request
- 5. DC power supply
- 6. Crane control interface
- 7. MSD sensor to check magnetic saturation

### Standard Safety features:

- Electro-perm technology cannot drop a load due to loss of power
- Test lift sequence prevents unsafe loads due to air-gap, load geomety, or actual load composition from being handled
- Lifter status lights to insure the operator always knows the lifter status
- Radio remote keeps the operator a safe distance while operating the magnet
- Safety switch prevents de-mag unless the load is safely on the ground
- CSS sensor to insure controller and magnet are working properly
- Safe button for de-mag to insure accidental de-mag cannot be achieved

#### Applications

Steel service centers, Mold and die shop, Fabricators, Heat treating, steel mills, Steel warehouse
